Steel Wheels keep on rolling!

A range of precision turned rolling stock wheels in two gauges, covering three different diameters, and a choice of journal sizes. The 3mm journaled axles will fit straight into LGB rolling stock with no modification, and all give that realistic clickety-clack over the rail joints as well as giving additional stability and weight.

32mm Gauge wheels, £6 per axle, £130 for 24 axles

PG502	24.5mm Diameter	3mm journal

A new innovation is the introduction of chemically blackened wheel sets as an alternative to painting. Currently available on the PG606 version at no extra cost, we hope to introduce it across the range as time goes on.
