G64 (Gauge 3)

Locomotive Kits

GWR Locomotives

Class 2021 0-6-0 Pannier Tank (Nos. 2021-2160)

This class of engine was built at Wolverhampton between 1897 and 1905 and consisted of 140 locomotives, Nos. 2021-2160. The class was very similar to the 850 class but with a 12 inch longer wheelbase at the rear. Originally they were built as saddle tanks but by 1930 most had been fitted with pannier tanks. By 1944 only three had been withdrawn and by the start of BR 120 were still in service. 2069 was the last to be withdrawn in April 1958. The kit builds an electric model, and has two different cabs and bunkers, to allow a considerable variety of prototypes to be portrayed. It consists of three sheets of brass etch and one of nickel silver. The frames are laser cut steel with brass spacers. Prototypical wheels are manufactured by Slaters in glass reinforced nylon with stainless steel tyres, uses the standard PDG100 Buhler Motor Gearbox, and includes the AM2263 GWR Pannier Cab Detail Kit. The kit builds into an extremely well detailed and accurate model. Length 411mm, Width 110mm, Height 166mm.

EG1500 Class 2021 Pannier Tank Electric, Full Kit.

Dean Goods 0-6-0 Tender Loco (Nos. 2301-2580)

These locos were built by W. Dean from 1883 and lasted into the BR era in the mid 1950's. The kit is largely etched brass with laser cut steel chassis. Wheels with stainless steel tyres manufactured by Slaters, and our standard motor and gearbox geared 1:33 are included. Sprung steel tapered buffers, a full set of castings including brake gear and cab details are included along with full instructions.

Length 660mm, Width 105mm, Height 178mm

EG1510 Dean Goods Tender Loco, Electric, Full Kit.

Class 8750 0-6-0 Pannier Tank Loco (Nos. 8750-8799, 9711-9799, 3700-3799, 3600-3699, 4600-4699, 9600-9682, 6770-6779)

NEW KIT CURRENTLY IN DEVELOPMENT

These locos were introduced in 1935 by C.B. Collett and lasted well into the BR era. Our kit is an 'easy to build version' with a three piece resin loco body, which is simply screwed to the steel footplate with self-tapping screws. The brass and steel chassis bolts together and has a preassembled brass gearbox and

motor. The chassis is supplied with Slaters stainless steel wheels and sprung pickups. Numerous castings and a full boiler backhead give a good level of detail. Full instructions are included. Length 413mm, Width 113mm, Height 160mm.

CMI500 Class 8750 Pannier Tank, Electric, Full Kit.

Class 78XX Manor Tender Locomotive (7800-7829)

The 78XX class locos were designed by C.B. Collett in 1938 to fulfil the traffic department's requirement for a new blue route engine. Twenty were built in 1938-39, with remainder being built under BR in 1950.

The GRS kit uses our standard formula of laser cut steel chassis for loco and tender. Footplates for engine and tender are etched brass as are the loco cab and dummy tender outside frames. The boiler, including smokebox and firebox are resin castings. The tender body is a one piece casting. A new Slaters/Mabuchi helical drive motor/gearbox is fitted as standard on the Slaters insulated stainless driving wheels.

All the outside motion is either laser cut steel or nickel silver etch with brass castings. The safety valve is cast in brass with a bronze chimney.

A full set of instructions, and Photo CD are included.

Length 845mm, Width 123mm, Height 180mm.

CMI508 GWR
Manor Tender
Locomotive. Full
Kit.

LMS Locomotives

3F Tank Locomotive - NEW KIT CURRENTLY IN DEVELOPMENT

Whilst the origins of this loco can be traced back to the Midland Engineer Samuel Johnson, the LMS first introduced their version in 1931, 422 were built with large numbers being sub contracted to Vulcan, Bagnall and Hunslet. Seven saw service on the S & D.

Our kit uses a multi part resin body which, when assembled with 'Cyano' adhesive is then screwed to a steel footplate.

The chassis is laser cut steel with Slaters wheel sets. The GRS motor/gearbox is fully assembled. Steel sprung buffers, full brake gear, and cab detail parts are all included. The kit comes complete with instructions.

Length 242mm, Width 120mm, Height 173mm.

CM1510 LMS 3F 0-6-0 Tank. Full Kit.

4F 0-6-0 Tender Loco - NEW KIT CURRENTLY IN DEVELOPMENT

Designed by Henry Fowler, these engines were the last of a long line of similar classes of engines dating back from the 1880's. They were ubiquitous and permeated almost the entire LMS system and most lasted well into BR days. Our kit is one of the easy to build variety and consists of resin castings for loco and tender bodies mounted on a steel footplate. Whitmetal castings together with a full cab backhead pack ensure a well detailed superstructure. The chassis is made up of brass spacers with laser cut steel frames and coupling rods, which are easily bolted together. Slaters wheels with stainless steel tyres and a brass motor gearbox geared 1:33 are included, along with plunger pickups and full instructions.

Length 725mm, Width 110mm, Height 170mm.

CM1514 LMS 4F 0-6-0 Tender Loco, Full Kit.

Southern Railway Locomotives

Stroudley Terrier AIX Class 0-6-0T - NEW KIT CURRENTLY IN DEVELOPMENT

First built in 1872 and still in service 90 years later, these locos went through significant changes over this lifespan. For our model we have chosen the period of the 1930's. The kit, which has been designed as an easy to build one, with a three piece resin body mounted onto a steel footplate and buffer beams. The chassis is a screw assembled steel and brass structure with pre-assembled motor gearbox

unit. Wheels are fully insulated with screw fit axles. A full set of instructions are included. Length 340mm, Width 105mm, Height 158mm.

CM1520 SR Terrier AIX class 0-6-0T Loco Kit.

SR (EX-SECR) 'N' Class Tender Loco

The first Maunsell 'N' Class loco emerged from SECR Ashford works in 1917. The first batch of fifteen locos were delayed by the First World War and were delivered between 1920-23. After the War the British Government ordered 100 locos from Woolwich Arsenal in 'kit form' to keep the workforce in employment, and in 1924 the Southern Railway purchased 50 of these for a bargain price. Various other railways purchased these locos as 'War Surplus' including the Metropolitan, which used them as a basis for their 'K' class 2-6-4T.

The GRS Mogul kit has laser cut steel chassis for both engine and tender. The loco and tender bodies are built mainly from etched brass. The boiler unit and cylinders are cast resin, the latter having nickel inserts. The Motion is laser cut steel and etched nickel silver.

The loco is powered by a Slaters/Mabuchi 1:40 helical drive motor gearbox. All wheel sets are the traditional Slater's stainless steel types.

The loco has numerous turned and cast brass fittings including sprung buffers. The kit whilst being reasonably complete does allow the builder to fit further

refinements of their choice, bearing in mind that the prototype went through various changes during its working life. Full instructions and CD of photographs is included.

Length 785mm, Width 115mm, Height 178mm.

CM1525 SR 'N' Class Tender Loco Kit

Passenger Coaching Stock Kits

SR Coaches

LSWR 51ft Kits

The LSWR produced blocks sets of non-corridor coaches from 1902-1912. By the early twenties the sets started to be broken up, often into pairs. The coaches were designed mainly to a 51ft length underframe, but the composite was only 49ft. The kits are produced with First and Third injection moulded modules, enabling a composite to be produced. Fully sprung brass etch bogies with Mansell wheels by Slater's. Whitemetal underframe castings with sprung steel/brass buffers. Full interior detail and build instructions are included. Length 720mm, Width 118mm, Height 168mm.

SG1640 LSWR 51ft First/Third Composite Coach Kit

SG1641 LSWR 51ft Brake/Third Coach Kit

Non Passenger Coaching Stock Kits

SR

SR (Ex SECR) PLV/GUV 4-Wheel Van

Large numbers of these 32ft 'Utility' vans were built from 1921 onwards lasting well into the BR era. Our kit represents a batch built by the SR in 1933. The body with solebar and buffer beams, is moulded in resin with a plastic floor and roof. Glazing simply slots in place. Underframe running gear is cast in whitemetal with insulated Slaters wheels. Full instructions are included.

Length 485mm, Width 118mm, Height 170mm. **CMD1630** SR PLV/GUV 4-Wheel Van Kit

LMS 6 Wheel Milk Tanker diag 1994 13' W/B

Introduced in 1931 after initial experiments with 4 wheelers had shown the need for greater stability, these 3000 gallon tankers were a common site on all regions of the UK well into the 1960's. The chassis is constructed in whitemetal with steel wheels and has a brass etch inside bearing centre axle unit to allow the axle to 'float'. The body is made using an injection moulded plastic tank with plenty of whitemetal details. The tank rests on hardwood chocks preformed and cut to size.

DGI861 6 Wheel Milk Tanker

LNER

LNER Horse Box diag 5, code 8005 14' W/B 1938 York

Derived from a Great Eastern design principally for the carriage of race horses, this then formed the basis for the later BR vans. The kit features moulded resin sides and ends, including the solebars, internal partitions, plastic floor and roof. Whitemetal castings are used to build the underframe detail. The axle boxes, brake gear are whitemetal with spring buffers. A small brass etch is provided to make the battery box and steps for this wagon. Screw couplings and vacuum pipes complete this very easy to assemble kit. Coach wheels, 49 mm diameter, are included in this kit.

CMD1892 LNER Horse Box Kit 14' W/B with wheels.

RTR Coaching Stock

Collett Coaches - Ready to Run

GWR CORRIDOR COACHES – Large window 'Sunshine' types introduced in the 1930's by C. B. Collett. As they were 8' 11" wide 'Yellow Disc' they could work widely across the country and lasted well into the B.R. period. Great care has been taken with design and manufacture of these coaches in the UK, with particular reference to the ease of building, to keep the labour costs low.

CONSTRUCTION

Body is Laser cut aluminium, chromate primed, Roof is aluminium extrusion with channel profile for side location. The floor and Sole Bars are machined from Aluminium. Interior comprises of interlocking bulk-heads and 2.00mm plastic glazing. The underframe comprises brass angle trussing with cast battery boxes, vacuum cylinders and dynamo. Bogies are made from laser cut steel with white metal side frame castings and are complete with Slaters Wheels.

Available in GWR Chocolate & Cream (totem and post-war available) and BR early period. The coaches weigh in at 4Kg and length is 872mm for the Brake and Third and 858mm for the Composite.

G Scale Standard Gauge Wheelsets

Manufactured by Slaters these wheels use high quality materials. The tyres are turned from stainless steel bar, before being inserted into a die block. The wheel centre boss is a brass turning, and once this is added, the spokes are formed from glass reinforced oil resistant nylon under a high pressure injection moulding process. The finished wheels are quartered and fitted to the 1/4" diameter hardened steel axle by a countersunk machine screw. Supplied complete with Crankpins and Bushes.

Gauge 3 Track

G64 (63.5mm) Gauge Track and G64/45 (63.5mm/45mm) Dual Gauge Track

GRS G64 Track is manufactured in a UV resistant plastic safe for outdoor use and has full chair and bolt detail moulded onto the wood grained sleepers. The brass code 330 rail is of a flat bottom profile and identical to 'Tenmille' G Scale rail. The track will appeal to G Scale enthusiasts who have wanted to have some standard gauge in the garden to complement their narrow gauge models, as most narrow gauge railways in the UK had standard gauge interchange facilities at one time or another; e.g. Welshpool, Barnstaple, Blaeneau, Aberystwyth; whilst the L&M used transporter wagons and interchange buffer stops; all of which are now available in G Scale. The GRS G64 track also gives an easy to lay option to all those enthusiasts who just want to model standard gauge railways in 'Gauge 3', often previously referred to as 2½ inch gauge. GRS G64 track comes in two different versions, 63.5mm gauge and 63.5/45mm dual gauge, both with full wood-grained plastic sleeper base with chair and bolt detail. Both tracks are fully flexible as the sleepers are moulded in sets of four with linking webs, which can be cut for increased flexibility. Track packs contain enough bases to make five yards of track and are complete with rail joiners.

- SGI400** G-64 Sleeper packs to make 5 yards of track with 10 brass fishplates
- SGI401** G-64/45 Dual Gauge Sleeper packs to make 5 yards with 15 brass fishplates
- SGI402** Code 330 Brass Rail 1.5m length
- SGI403** Fishplates (10)
- SGI404** Rail Built Buffer Stop. Built with code 330 rail

Pointwork

Manufactured in LGB brass rail using hardwood sleepers, soldered staples and brass plates. There is a standard range usually available from stock: -

- IGI406L** 8ft Radius 12 degree angle, Left Hand
- IGI406R** 8ft Radius 12 degree angle, Right Hand
- IGI408L** 10ft Radius 10 degree angle, Left Hand
- IGI408R** 10ft Radius 10 degree angle, Right Hand
- IGI4010L** 12ft Radius, Left Hand
- IGI4010LR** 12ft Radius, Right Hand
- TIE123** 8mm Throw Point Lever Brass/Stainless Steel
- TIE001** Lever Frame Kit
- TIE004** 8mm Throw Point Lever Kit

Custom trackwork

Sometimes the standard items stocked are insufficient for the desired layout and in these circumstances GRS can offer custom trackwork for both G64 and G64/45 (dual gauge). The items are constructed from code 330 rail stapled and soldered to hardwood sleepers and have included 3-way points, double and single slips and crossovers. Due to the many combinations available, quotations are given on an individual basis.

G122 Electric Pick Up Set for above Chassis

Locomotive Detailed Paint & Lining Service

GRS offer a Painting and lining service for your Live Steam or Electric Locomotives. The lining can be single, double or triple and is carried out using a bow pen and enamel paints. The finished product is painted to a very fine standard and adds an impressive look to your locomotive. Full details and quotations are available upon application.

Narrow Gauge Prototype Coaching Stock

Welsh Highland Railway Coach Kit

The prototype for this coach has been built by the Festiniog railway at Boston Lodge works. The model has a fully panelled resin moulded body with detachable preformed plastic roof. Seats are supplied to give a fully

fitted interior. Archbar whitmetal bogies with insulated steel wheels are included. Scale 16mm/1ft. Length 660mm.

CMA327 *Welsh Highland Coach 45mm*

Lynton & Barnstaple Coach Kits

Built to 16mm Scale this is the first time that British outline G scale plastic injection moulded coach kits have been available. The bodies of these kits comprise plastic side panels and ends with all beading and droplights present.

As the coaches are modular in construction, coach lengths can be reduced, variations can be made and freelance short coaches can even be produced. Gas lamp tops, ventilators, vacuum pipes, steps and bogies are all injection moulded and vacuum forming is used for roof and seating sections. Steel insulated wheels are included in the price of the kit, in either 45mm or 32mm gauge. As the side panels and ends are buff coloured, interior painting is not essential. Plastic running boards and wire for handrails are included. It is suggested that where LGB 2ft radius track is in use, the length of the coach is reduced by one compartment to six.

7 Compartment Length 572mm, Width 107mm, Height 152mm

6 Compartment Length 490mm, Width 107mm, Height 152mm

L & B Coach Kits

SG1001 *Coach Third Class*

SG1004 *Brake/Third Class*

End and Side Modules

Welshpool & Llanfair Light Railway Coaches

Modelled in 16mm. 1ft scale these coaches are the ideal companions for the Earl or Countess Locomotives from Pearse or Accucraft. The coaches were supplied to W&L in 1902 by Pickering & Co. of Wisham, Glasgow. Two types were produced, a brake composite and a full third. Overall dimensions are the same for each coach. Length 535mm, Height 160mm.

The coaches are manufactured using injection moulding technologies to give the full detail of the body panelling. By use of a modular system of building, six side modules (three per side), two end modules and a floor, a rigid box structure is formed. Ideally this should be painted before adding the glazing. The domed roof is vacuum formed in styrene and has roof strengtheners, which also provide an easy means of fixing. End balconies are cast in whitemetal. The coach has compartment dividers and sets. Ventilators, steps and underframe details are also supplied. Bogies with 45mm gauge plastic wheels are supplied as standard. 32mm gauge converter wheels can be supplied at extra cost.

Coach Kit (Transfers not included)

SG1041 Full Third Coach Kit

NB203 Cambrian Waterslide Transfers (1909-23)

NB204 GWR Waterslide Transfers (1923-31)

Lynton & Barnstaple Freight Rolling Stock Kits

Built to 16mm scale, rolling stock manufactured mainly in plastic, some whitemetal parts in certain kits.

L&B Bogie Open Wagon with Tarpaulin Rail

The horizontal planking of the prototype has been faithfully captured on the model by means of scribed plastic sheet for the ends and sides, which form a rigid box structure.

The floor and solebar section are vacuum formed plastic. External details are added in the form of injection moulded parts with wire for the tarpaulin rail. The Kit version is supplied as a body kit without bogies or wheels. These are available separately for either 45mm or 32mm gauges (see General Parts section). Plastic bogies are also available from MDC or LGB (see relevant lists). Transfers are available separately. Length 440mm, Width 100mm.

DG170 Whitemetal Bogie Castings 45mm or 32mm gauge (wheels extra)

NB322 Waterslide transfers Freight Stock white lettering

Lynton & Barnstaple Bogie Van Kit

These GRS British Outline can kits are manufactured to 16mm scale in heavy duty plastic with full plank and rivet detail. Using a mixture of injection moulding and vacuum forming techniques. The floor solebar unit is fixed to two injection moulded ends and scribed plastic sides. A false roof then completes the rigid box structure. This is then detailed using injection moulded wood-style strapping to give the characteristics Lynton & Barnstaple bogie van finish. The kit also includes a preformed roof with strengtheners, truss rodding and brake gear. Bogies and couplings are not included but are available separately for 45mm and 32mm gauges. Length 435mm, Width 100mm, Height 145mm

SG1200 X Braced Van Kit

For bogies see L&B Bogie Open Wagon

Lynton & Barnstaple Bogie Brake Van Kit

These Brake Van Kits are of similar construction to those above, but are not the internally braced type with vertical planking. This is achieved with injection moulded parts and scribed plastic sheet. Parts for the guards compartment vary according to which type is chosen. Bogies and couplings are not included but are available separately for 45mm or 32mm gauges. Transfers are not included. Length 435mm, Width 100mm, Height 160mm

Modular Coach Kits

Based on L&B modules these coaches offer enormous potential to the modeller who wishes to produce something different. Using the basic kit, one can produce a

very acceptable four compartment coach body quite easily. By purchasing extra parts such as guard's doors and duckets, one can then produce various guards type vehicles. Being modular in construction a whole variety of types of coaches can be constructed by the simple expedient of cutting and varying the position of the various modules. Various coach accessories, bogies and wheels are available

SG1010 Three Compartment Coach Body Kit, sides, ends, roof, floor and glazing

SG1008 Five Compartment Coach Body Kit, sides, ends, roof, floor and glazing

SG1009 Seven Compartment Coach Body Kit, sides, ends, roof, floor and glazing

SG1011 Full Brake Body kit, sides, ends, roof, floor and glazing

Sample 4 Compartment Coach

Freelance W&L Open Balcony Coach kit

Based on W&L modules this plastic kit contains injection moulding W&L coach side & end modules with all the bolection detail and tumblehome preformed (illustrated under W&L Coaches). The roof and trusses are vacuum formed and the floor is pre-cut for easy fitting. Glazing material, rubbing strips and underframe trusses are included together with plastic

bogies and wheels (45mm gauge). Wheels can be re-gauged to 32mm if required. Couplings are not included. Length 385mm, Width 100mm, Height 157mm.

SG1048 Freelance Open Balcony Coach Kit

SG1053 Freelance Balcony Brake Coach Kit

Freelance 1900's Modular Coach Kit

Based upon 1900's stock these coach modules make up a body in a very similar way to the L&B modules. However, this time they incorporate a tumblehome and offer a choice of two compartment sides using two different modules. The kit includes ten of each module, four ends, glazing, floor material and two roof mouldings, 430mm long which can be cut to suit, to make two coaches.

SG1049 Freelance Coach Body Kit, First/Third

SG1050 Freelance Brake Coach Body Kit

SG1051 Guards Van Parts (Double Doors, Duckets, Plain Panels)

Stuart Coaches - Produced exclusively by GRS

Rugged & beautifully engineered, powder coated steel construction, glazed and fitted with seats, supplied ready to run with a choice of 32 or 45mm Stainless steel wheels in robust moulded bogies fitted with loop & hook couplings.

Building Kits

Yarwood Prototype Building Kits (Designed by David Yarwood.)

A range of unpainted buildings made from fibre-glass, resin and plastic.

YG601 Caersws Station

This superbly detailed model reproduces the authentic stone construction with slate roof. Also featured are finely etched brass bargeboards to the gable ends.

Height 300mm, Length 680mm, Width 135mm.

YG602 Watlington Station

The original building was of stone and knapped flint construction with a slate roof. The model recreates many of the fine features Found in the original.

Height (inc. Chimney) 270mm, Length 442mm, Width 182mm.

YG629 Dinas Signal Box

The original building featured wooden weatherboard construction with a slate roof, faithfully reproduced on this model, along with detachable simulated stone base, allowing the signal box to be used as either a ground frame or platform version.

Height 265mm, Length (excluding porch) 185mm, Width 150mm.

YG631 Watlington Signal Box

The model features simulated vertical boarding and felted roof, and includes entrance steps for side doorway.

Height 215mm, Length 175mm, Width 165mm.

Lynton & Barnstaple Railway Buildings Kits

Due to their size in G Scale some are reduced to help enthusiasts with limited space.

YG603 Woody Bay Station

A well detailed model of the preserved L&B station built in Nuremberg style with interesting roof angles capturing the flavour of the prototype.

Height 275mm, Length 620mm, Width 305mm.

YG609 Chelfham Station Kit

A small station building of stone construction with a tiled roof and distinct barge boards.

Height 166mm, Length 323mm, Width 167mm.

YG615 Lynton Goods Shed

A typical stone and slate building with wooden doors and canopy. Reduced in length to only one loading bay instead of two. Height 265mm, Length 470mm, Width 320mm.

YG637 Pilton Signal Box (Freelance)

Timber frame building on a stone base. Tiled roof with 4-pane windows.

Height 235mm, Length 185mm, Width 160mm.

YG636 Barnstaple Signal Box

Timber frame building on a stone base. Slate roof with 6-pane windows.

Height 235mm, Length 185mm Width 160mm.

Freelance Building Kits

Station Halt

This building has a side shelter for passengers. Height 230mm, Length 310mm, Width 160mm.

YG612 Open Shelter Kit

YG625 Engine Shed with Water Tank

Gabled roof over a brick engine shed with climbing ivy and weathered all over.

Overall Height 290mm, Length (doors open) 410mm, Width 230mm, Entrance Width 130mm, Door Height 185mm.

Lineside Hut with Chimney

Finished with either, wooden walls and corrugated iron roof or simulated stone walls with felt type roof. Height 130mm, Length 170mm, Width 145mm.

YG617 Wooden Hut Kit

YG618 Lineside Stone Hut Kit

YG619 Goods Office/Weighbridge Hut

A typical example of a small railway building constructed in stone and slate used for various purposes.

Height 240mm, Length 175mm, Width 145mm.

YG630 Loughborough Signal Box A faithful model of the GCR Box still being used by the heritage railway to this day, but equally typical of many Wood and Brick structures used all over the UK. Height 260mm, Length 365mm, Width 160mm.

YG673 Large Engine Shed with Water Tank

As YG625 but 600mm long, 185mm wide, 280mm high

Ready Built Buildings

Manufactured by David Yarwood from exactly the same materials as the kits, but supplied built and painted.

YG665 Water Tower 75mm x 75mm x 268mm

YG666 Signal Box with Steps 185mm x 115mm x 280mm

YG667 Signal Box Small 165mm x 110mm x 190mm

YG668 Ticket Office 160mm x 130mm x 150mm

YG670 Ticket Hut & Shelter 290mm x 130mm x 150mm

YG671 Shelter 160mm x 130mm x 150mm

YG672 Platform Signal Box 120mm x 110mm x 175mm

British Outline Building Kits

This range of kit is designed to create the atmosphere of railway buildings in all the areas of Great Britain. They are robustly made from fibre-glass resin, are weatherproof and easy to assemble and paint. There is a great deal of detail, which will stand up to close inspection. Suitable for narrow or standard gauge.

BO05 Gresford Station (Stone)

Based on the prototype this station has several interesting architectural features including a gabled roof, and end bay window. Height 285mm, Length 560mm, Width 240mm.

BO06 Evergreen Station (Stone)

A typical small English design built in stone, a smaller version of Gresford but without canopies. Height 275mm, Length 540mm, Width 230mm.

BO07 Station Annex (Stone)

This small annex complete with interconnecting wall section **could be used to upgrade your station's facilities or as a porter's office etc. Made to match Evergreen Station.**

Height 225mm, Length 195mm, Width 170mm.

BO09 Small Country Station (Brick)

A typical small English design.

Height 270mm, Length 380mm, Width 240mm.

BO10 Country Station (Brick)

This station may be found from the commuter belts of London, to the countryside of Wales. A small selection of name boards and signs is supplied. The platform canopy is removable for Winter storage.

Height 350mm, Length 540mm, Width 290mm.

BO11 Station Waiting Room/Porters Hut/Toilets

An addition to the station or a small building on its own, perhaps a Crossing Keepers Hut, complete with outside chimney breast and tall chimney. Choice of signs supplied.

Height 260mm, Length 180mm, Width 170mm.

BO22 Station Terminus Over-Canopy

This imposing over-canopy is typical of those found at larger terminus stations and is dated **around the 1960's so has a more modern image.** Produced in a brick finish to match BB10.

Height 320mm, Length 540mm, Width 55mm.

BO17 Footbridge

A concrete type footbridge with brick stairs similar to those found on many British railways. Length 510mm, Overall Height 2145mm, Length of Staircase 150mm, Width of Staircase 69mm, Track Clearance Height 170mm.

PPG205 GWR Type Lattice Footbridge

Suitable for double track. Flat packed etched brass with plastic supporting columns. Decking and steps etched to represent wooden planking as used on prototype. Rivet detail included on vertical side frames. Easy fold up construction mainly bolted with minimal soldering required. Footprint 715 x 305mm. Width Between Staircases 560mm, Centre Clearance Height 210mm.

BO12 Signal Box (Brick)

A typical design to be found almost anywhere. The kit comes with a choice of corrugated tin or slate/tiled roof and brick or metal chimney. The windows can be assembled open or closed swivelling, tilted or sliding. This same versatile kit allows several variations around your railway. Name boards supplied.

Height 310mm, Length 190mm, Width 135mm.

Goods Office

Typical of the 'found everywhere' office/stores – this one might be off the end of Newbury Racecourse GWR station anytime 1900-1960. Tin roof, brick and metal chimneys included.

Height 250mm, Length 180mm, Width 155mm.

BO13 Goods Office (Brick)

BO21 Goods Office (Stone)

BO14 Signal Box & Goods Office Set (One each of *BO12* Signal Box & *BO13* Goods Office)

BO16 Junction Signal Box

A typical medium sized signal box, built in brick with slate roof and outside stairs. The latter can be as illustrated or parts are included to make an alternative wooden staircase.

Height 320mm, Length 205mm, Width 170mm.

BO18 Water Tower

A typical rectangular, brick based, metal tanked water tower found in profusion all over the British Railway system at one time. Height 310mm, Length 190mm, Width 110mm.

BO23 Lineside Hut/Small Office

Small common-place building with tin roof used as yard offices, shed offices, paint stores, crossing keepers huts, etc.

Height 144mm, Length 120mm, Width 85mm.

BO19 Engine Shed

Typical brick built Engine Shed. A typical design of single bay shed to be found anywhere in the British Railway scene. Height 280mm, Length 362mm, Width 220mm. (Also **BO75** Double length version)

BO70 Engine Shed Extra Height Kit

(Eight components, moulded in stone finish to give extra 25mm height to Engine Shed **BO19**)

BO20 Goods Shed

Typical brick built Goods Shed that was found over the entire British branch line railway scene.

Height 270mm, Length 362mm, Width 220mm.

BO71 Goods Shed Extra Height

A kit of nine components, moulded in stone finish, to give extra 25mm height to all walls of Goods Shed **BO20**. A set of additional steps are also included.

BO56 Station Garage

This typical motor garage has been converted from the old horse stables adjacent to the coal yard. Height 190mm, Length 240mm, Width 170mm.

BO50 Diesel Refuelling Point

A common sight for any railway running diesel locomotives. Diesels can't do without them!

Height 150mm, Length 185mm, Width 80mm.

BO55 Station Coal Yard Office

Hundreds of these offices were to be found in goods yards all over England.

Height 190mm, Length 180mm, Width 160mm.

(Note: Coal sacks cast in resin available separately)

BO61 Complete Halt Kit

Complete narrow gauge kit of Open Halt, Ground Frame, Flower Bed and Water Tank.

BO61A as **BO61** but with 16mm Doors

BO65 Bridgend Halt

A narrow gauge signal box mounted on a stone base with slate roof, wood planking walls and gable end tile hanging. Suitable for 16mm. Height 210mm, Length 150mm, Width 150mm.

BO66 Narrow Gauge Halt and Shelter

A narrow gauge waiting room and shelter with post box let into the wall and a bench seat in the waiting shelter.

Height 210mm, Length 250mm, Width 205mm.

BO76 Sign & flower bed

BO67 Narrow Gauge Water Tank

A narrow gauge round water tank mounted on stone walls and a brick plinth complete with door (non-operational) for access beneath tank.

Height 215mm, Length 135mm, Width 80mm.

BO68 Coaling Stage & Sand Store

A two part kit comprising coaling stage and sand store, moulded in resin, suitable for a small engine stabling point.

Height 85mm, Length 350mm, Width 135mm.

BO69 Weighbridge

A weighbridge was a common feature in railway freight yards until fairly recent times. The resin kit is supplied with weighbridge building, weighing plate, gutters, drain pipe and coal sack. The approach to the weighing plate is cast in cobbled stone. A cast 'Weighbridge' sign is included and a 'Coal & Scrap Merchants' sign is moulded into the rear wall.

Weighbridge Hut Base 300 x 150mm, Weighbridge Plate 320 x 140mm. Kit also includes a length of rail for edging of the weighbridge plate.

BO72 Platelayer's Wooden Hut Kit

A kit of 6 resin parts with hinged roof. The building reproduces the gangers' life, the scythe for cutting the embankment grass and sharpening wheel. Typical rubbish lies on the roof and shutters cover the windows.

Height 115mm (excluding chimney), Base 210 x 140mm

BO73 Platelayer's Stone Hut Kit

A kit of 6 resin parts with hinged corrugated iron roof. Fire in disused oil drum is adjacent to door. Typical rubbish lies on the roof and wooden shutters cover the windows.

Height 135mm (excluding chimney), Base 200 x 170mm.

Railway Terraced Cottages

Typical of the Signaller's or Crossing Keeper's dwelling, this standalone kit can also be formed into any number of terraced houses, as seen in railway towns such as Reading, Swindon, Crewe, Doncaster etc. Street names supplied.

Height 330mm, Length 183mm, Full Relief Width 156mm, Half Relief Width 82mm.

BO30 Terraced Cottage (Brick)

BO31 Terraced Cottage (Brick/Flint)

BO38 Terraced Cottage (Stone)

BO45 ½ Relief Terraced Cottage (Brick)

BO46 ½ Relief Terraced Cottage (Brick/Flint)

BO47 ½ Relief Terraced Cottage (Stone)

BO32 ½ Relief Terrace Cottage x 2 (Brick)

BO37 ½ Relief Terrace Cottage x 2 (Brick/Flint)

BO39 ½ Relief Terrace Cottage x 2 (Stone)

BO49 ½ Relief Terraced Cottage (Inside Corner)

BO33 ½ Relief Terraced Cottages with Backyards

Typical of all railway approaches to industrial towns. The rows

and rows of backyards typified in television's Coronation Street. Street names supplied.

Height 330mm, Length 360mm, Width 220mm.

BO15 Station Master's House

This kit consists of a Railway Terraced Cottage (**BO30**) with the centre part of the backyard extension of **BO33** attached to the rear.

Height 330mm, Length 183mm, Width 315mm.

BO64 Waiting/Porters Hut

BO63 Lineside hut

Height 180mm, Length 180mm, Width 150mm.

BO36 ½ Relief Corner Shop

Height 325mm, Length 250mm, Depth 80mm.

Corner Pub ‘The Railway Tavern’

Typical brick built English pub. The kit can be used with the cottages to form a corner at the end of a terrace. Available in full or half relief.

Height 325mm, Length 250mm, Width 250mm. 80mm.

BO34 Corner Pub

BO35 ½ Relief Corner Pub

Terraced Shops

A variety of brick built terraced building kits that can be placed together or mixed with terraced cottages (see diagram above).

BO51 Terraced Shop

BO52 ½ Relief Terraced Shop

BO53 Double Fronted Terraced Shop

BO54 ½ Relief Double Fronted Terraced Shop

BO60 The Codfather Fish & Chip Shop

Brick built Fish & Chip shop which can be placed together with other shops or incorporated into the range of terraced cottages.

Height 330mm, Length 270mm, Width 156mm.

BO57 Welsh Farm Cottage

A typical farm labourer’s

stone cottage with slate roof from North Wales. The cottage has a porch and a lean-to for wood etc. It can be finished in a number of styles to give variation.

Height 190mm, Length 260mm, Width 146mm.

BO59 Terraced Farm Cottages

Similar to the Welsh Farm Cottage, but now available as a terraced set. Complete with a lean-to at the rear.

Height 200mm, Length 500mm, Width 146mm plus 80mm lean-to.

BO58 Black Boy Inn

15th Century Inn based on a real pub in Caernarvon dating from 1922 and known locally as The Bachgen Du. This resin cast kit has over twenty components, and is well detailed including window boxes and hanging baskets and transfers.

Height 300mm, Length 600mm, Width 200mm.

BO40 English Church

A typical random stone church moulded in resin. Complete with tower and optional spire. Printed glazing is included.

Height 340mm, (with spire 535mm), Length 380mm, Width 245mm.

BO41 Windmill

Based on the preserved smock mill at Lacey Green in Buckinghamshire.

Height 480mm, Height to top sail 770mm, Width 300mm.

BO78 Watermill

A typical country overshot watermill with turning wheel. Just add a stream!

Height 480mm, Height to top sail 770mm, Width 300mm.

BO44

Thatched Cottage

A typical half timbered cottage,

Height 340mm,
Length 300mm,
Width 200mm.

(Also **BO43** Terraced cottages, as BO44, but 490mm wide)

Station Canopy

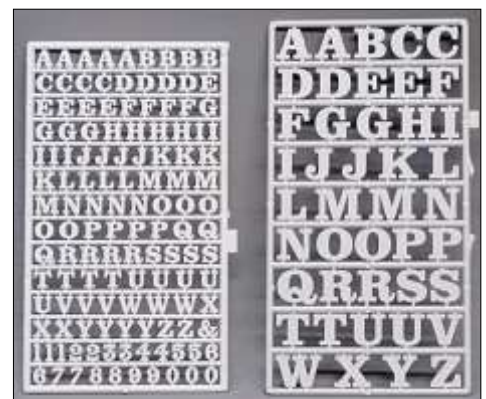

The Canopy, which is modular, consists of plastic injection mouldings, with a choice of solid or clear roof panels, which have been omitted in the picture to reveal the structural parts.

(Several kits can be used together if required, each is 896mm long, 180mm high, and 148mm wide. **SG1308** Solid roof kit, **SG1327** Clear roof kit.

Components are available separately; - **SG1323** Clear roof panel, **SG1324** Three support columns, **SG1325** Six (150mm) roof valences, **SG1326** Three roof trusses, **SG1328** Solid roof panel.

Slaters Plastic alphabets, make your own custom signs and name boards.

SL1107 13.5mm Lettering (2 Sprues) **SL1113** 7mm Lettering (1 Sprue)

KIPPO MODELS

A range of resin building kits suitable for both indoor and outdoor use and are made to be resistant to warping by the sun.

RAILWAY BUILDINGS

B-S0001 GWR Signal Box

A typical GWR Style Signal Box with finger jointed corners allowing a strong and aesthetically pleasing finish.

Height 300mm, Length 370mm, Width 210mm

B-S0002 LMS Signal Box

A wooden style signal box suitable for Standard Gauge and Narrow Gauge railways.

Height 270mm, Length 200mm, Width 130mm

B-T0001 Ticket Office/Waiting Room

Ticket office/waiting room kit.

Height 190mm, Length 220mm, Width 140mm

B-S0001sm Small GWR Signal Box Kit

Approx. Height 300mm, Length 280mm, Width 200mm

B-T0002 Ticket Office/Waiting Room

Add detail to your station with Ticket office/Waiting room kit.

Height 190mm, Length 220mm, Width 140mm

B-T0003 NBR Station Building

Inspired by NBR station buildings in Fife. This kit is suitable for platforms 150mm to 200mm wide.

Height 230mm, Length 600mm, Width 140mm (not including canopy)

B-H0001 Lineside Hut

Add detail to your station or goods yard with this lineside hut.

Height 190mm, Length 200mm, Width 130mm

B-H0002 Double Door Platelayers Hut

Height 130mm, Length 200mm, Width 140mm

B-H0003 Platelayers Hut (Flat Roof)

Height 130mm, Length 200mm, Width 140mm

B-H0004 Platelayers Hut (Pitched roof)

A typical brick built hut for use by the lineside or goods yard.

Height 190mm, Length 200mm, Width 130mm

B-T0005 Brick Toilet Block

Individual Ladies and Gentlemen resin signs with raised edging and letters in a cast iron style.

Height 190mm, Length 200mm, Width 130mm

B-W0001 Water Tower

Suitable for Standard Gauge and Narrow Gauge railways. Easy build with the main body cast as one piece.

Height 230mm, Length 80mm, Width 80mm

HOUSES AND SHOPS

B-C0001 Brick Terraced House - Half Relief

This house has a flush roof and guttering to allow joining of houses. Chimney stacks consist of 4 finger jointed parts and separate chimney pots.

The windows have a separate sash which can be glued open.

Height 450mm, Length 170mm, Width 120mm

B-C0002 Brick Mid-Terraced House - Half Relief, Skeletal

This house has skeletal side walls and is designed to go in between 2 houses. If you want to build a row, you will need to buy the half relief single house. Height 450mm, Length 170mm, Width 120mm

B-C0003 Brick Terraced House

- Full Relief

This house has a flush roof and guttering to allow joining of houses. Chimney stacks consist of 4 finger jointed parts and separate chimney pots. The windows have a separate sash which can be glued open.

Height 450mm, Length 170mm, Width 240mm

B-C0004 Brick Mid-Terraced House

- Full Relief, Skeletal

This house has end skeletal walls and is designed to go in between end terrace houses.

Height 450mm, Length 170mm, Width 120mm

B-B0019 Brick Mid Terraced Shop

This shop has a flush roof and guttering to allow joining of houses. Chimney stacks consist of 4 finger jointed parts and separate chimney pots. The windows have a separate sash which can be glued open. A choice of names are also included in this kit.

Height 450mm, Length 170mm, Width 250mm

Height 280mm, Length 410mm.

LCG17 Small Retaining Walling

Height 60mm, Length 445mm.

Commercial Track-Work

GRS can offer proprietary track from several suppliers; -

In 45mm Gauge we can supply the full range of LGB items, usually from stock. Constructed from code 330 Brass flat-bottomed rail this track is robust, simple to lay, and will last for many years even in the most demanding situations.

The alternative Peco G45 system is also stocked in depth, although the range available is much more limited. Made from Code 250 Nickel-Silver rail the Peco G45 Track presents a slightly more delicate appearance which some will prefer, albeit needing slightly more support when laid in the Garden when compared to the code 330 versions. (NB it is possible to join Peco and code 330 systems via special Peco SL-912 joiners)

Naturally we also supply Joiners both plain and insulated for all systems, and also Massoth rail clamps, which are unique in allowing track to be uncoupled vertically, convenient when it comes time to maintain Points.

For 32mm we supply Peco SM32 track, which again is Nickel-Silver, although in code 200 size. There is a better range of points available for this from Peco, but still many gaps such as crossovers, which is where our handmade track comes to your aid. Please note that our range of 32mm points are now discontinued so check our website for availability.

Handmade Track-Work

GRS offer a range of hand made Trackwork in 32mm, 45mm, and 63.5mm gauges. Constructed in either Peco code 250 or LGB code 332 rail. The range of Points, in radii not offered by other manufacturers, gives our customers a greatly increased choice in determining their track layout. In addition items such as Slips, Y-Points, and buffer stops are also in the range.

The track features hardwood sleepers, saturated in preservative, to which the rail is fixed using staples and solder. The resulting structure is strong, employs no non-conductive rail sections, i.e. frogs, and will give many years of trouble free service in the great British climate. Where 32mm items have to connect to code 200 rail, the flat bottomed 250 rail is slit at the end to accommodate the SL-810 Peco rail joiner and ensure that the rail head heights match.
